Course Description
This class is a continuum of Internship I. It is designed to equip to student with the most comprehensive review of assessment and therapy methods. It blends theory and research with practical treatment goals, process and techniques.

Course goal
The class aims to provide the most comprehensive understanding of the clinical practice in counseling and psychotherapy. It will offer a forum for a variety of conceptualizations regarding relation between theory and practice.

Course objective
Upon the completion of this course, students who faithfully attend to the requirements of the class will be able:
1. To understand the therapeutic factors that contributes to clinical classification of disorders.
2. To apply the basic clinical skills and tools of writing case presentations, conducting interviews and writing psychological reports.
3. To learn to write case presentations, conducting interviews and writing treatment plans.
4. To effectively use the counseling techniques in therapeutic sessions
5. To learn to express the events and process of therapy in terms of case study presentations and interpretations.
6. To use other relevant supportive sources, both psychological and pharmacological (as they may apply in every case) also enter into the overall assessment following the provision of an impression or diagnosis following the five axis of the DSM IV-TR.

FYI: DSM-V becomes effective in 10/2014.

Required Text book

Suggested Textbooks for further reading
Course Correlation
The seminar will combine relational diagnosis with a step-by-step process of assessment and treatment. Advanced clinical issues will be addressed and an emphasis on the self of the therapist through process recordings.

Process Recording: further instruction to be given in class.

**Student will present 3 Case presentations.** The presentation will reflect the student understanding of theory and practice of counseling and psychotherapy.
