Required Texts:

4) The Holy Bible (Select Scriptures: No Paraphrase Please)

Course Description:

How could a good and loving God allow such evil and suffering: war, poverty, famine, and starvation? People with disabilities suffer from the evils of the world more than many other people groups. How could God allow this to happen to the most vulnerable? Considered one of the largest underrepresented groups, there are over 650 million people worldwide who live with a disability (roughly 10% of the world’s population). It is also one of the largest unchurched groups on earth. This is most unfortunate because people affected by disability have much to teach us about spiritual transformation. Their specific plight—their sufferings both personally and publically—mirror the human condition and Christian journey in many unique ways.

The purpose of this course is to explore the problem of evil in general and then to examine ways in which the disability community provides the global church with a dynamic model of spiritual transformation. The serious student will take away from this course not only a deeper understanding of the disability community and the church’s obligation to reach out to those who are most vulnerable, but he/she will also learn to embrace their own brokenness in a whole new way. This course will benefit those who are majoring in biblical studies, education, counseling, human services, business, any health-related field, or intercultural studies.

By the end of this course the student will be able to:
